About This Game

Explore the surreal archipelago of the celtic otherworld Annwn (ann-oon), evading the sweeping gaze of the Watchmen. Hurl your soul from one totem to another in search of answers. Manipulate the environment to progress, but beware of disrupting the balance of light and darkness...

Annwn is an abstract stealth strategy game about making decisions under pressure, played across a series of bleak and lonely procedural islands.

You are a disembodied soul, able to dissolve and recreate elements of this mist-shrouded archipelago. Absorb the energy of trees and rocks, and use it to create totems which you can possess...anywhere that you can see the floor. Pump more energy into a totem to raise it higher before transferring your soul to it. Ascend the hills but watch out for the slowly revolving Watcher, who will try to redistribute your precious energy across the landscape. Find clues to the fate of your lost love hidden around the landscape before ascending to absorb the Watcher itself and move on.

- Infinite variety of procedural islands.
- Improve your abilities by absorbing Watchers.
- Campaign arcs deliver stories of love, loss, life and death.

-
- Other, undocumented mysteries await in the Otherworld...

not playable.. funky game. This game is a joy. I had it open for less than 5 minutes and the first level got me cracking a smile, and again every time they reveal a new mechanic. Intuitively satisfying. The interface is elegant and the gameplay is rewarding. Wear headphones for some intense ASMR: you will feel like you've entered a sacred realm of pure blissful geometry. Looking forward to user submitted content or DLC. I can't believe The Witness costs \$40 compared to this.

A steal at \$5. Get it or regret it.. Not my cup of tea. Impossible to play.. 4 player split screen lorry racing with traffic... boooosh!. The real Dark Souls begins here. To preface, my playtime is a bit off, it should be something more like 17 or 18 hours. That aside, I'd say I was pleasantly surprised by Office Lovers. I came into it with somewhat low expectations, but it turned out better than I thought. For starters, the concept didn't really draw me in, as I've never been the type to be into work relationships or even forbidden romance in particular. Plus, a game focused around working and offices just sounds boring in general. But it was actually alright, the art is really clean and pretty and the character designs are enough to tickle my fancy. I do have to agree with some of the other reviews as there really was quite a bit of sexual harassment, though I suppose I've come to expect this from a Dogenzaka Lab game, lol. It really wasn't that bad and I would just classify it as dub-con at best, which isn't unusual in the otome genre. Not to mention I actually really like the protagonist of this game, she was a really hard worker and didn't just passively let these guys do whatever they want, she said 'no' and gave her opinions too. There were a few comments made that seemed a bit sexist, and I could have done without them, but I don't think they were too out-of-character for this game either.

One of my few complaints is that while the soundtrack is on the same level as boring elevator music, the part that got me is when it would just very abruptly stop and go silent for a while or switch to something completely different. The cuts were rather jarring and usually not even during 'tense' moments where it would be deemed appropriate. The translation was good, the few errors that arose were often easily overlooked, and sometimes some of the characters' names would revert back to kanji for a line or two, but the script as a whole was clear to understand. It took some deciding but I think Hyoga's route is my favourite, he seemed the least pushy of all of them and the most believable in his love for the protag - but Kaido was pretty cool too. I had fun with this otome, even when they just talked about work it wasn't a complete snooze-fest and it was nice seeing the protagonist's passion for her job and how well she worked with the others. +1 rec from me!

It has potential, but ultimately its just not worth it.

Crashes fairly often, and lost quite a bit of progress because of that. Should have refunded then!

Outside of the bugs, the game is simply too random. If the dice rolls and card draws were the only random elements, that would be fine, but so many other parts of the game are also completely random. Most notably, buying monsters. As you run around the board, you encounter neutral and hostile monsters. Outside of buying cards and upgrading your own monsters, you can use gold to recruit these neutral and hostile monsters, and there are a few types of decks that focus on this. Unfortunately, this is random. Sometimes you can recruit the monster, sometimes you can't.. Wow, very good, very unique. I haven't experienced anything in VR like this. Similar in some mechanical aspects but really nicely put together. Looking forward to the full experience.. Less than bargain bin quality. First of all i my computer setup:

Intel core i7 3770

GTX 1070

Samsung 850 EVO SSD

Oculus Rift

My problem now is that the game has such a bad performance (even on the lowest grafik settings) that I wasn't even able to play threw the tutorial.

I am talking about an estimated 3 FPS and it takes a while when you look around till the screen even loads.

You can argue that my CPU is not the newest but i have ablosulty no problem in most of the other vr games

. Beat the game in 1.5 hrs.

For serious gamers: Add endless mode plz, otherwise barely worth 10\$ for me.

For Children, teens and casual gamers: Buy it now!

Pros:

- Stunning flattened aesthetic
- Educational for mental arithmetic

Cons:

- Low replayability. Flashback is back. One of the coolest games from the days of Sega G is re-imagined on Steam. Complete with achievements and improved graphics (everything looks so much more real and alive). If you liked the original you will be exited by this remake. Flashback is sci fi cyberpunk at its best. Retrieve your memories, travel across space and thwart an alien invasion in a stunning futuristic setting. It is mostly the same storyline but has a few bike races that were not in the original. Also, check out the cool power ups and in game tutorial stage. Platform style shooter with futuristic devices (force fields, teleporters, glasses from the movie They Live, holocubes, (watch out for those antimatter fields), and more). Clearly an underated game.

. Dev Update 25.09.2014:

Good afternoon Off-roaders,

A few days ago I mentioned in a topic on the Oovee forum that I would be releasing information and details of the next update after internal discussions.

So to begin with, I would like to thank you all for your patience and understanding - a company of our size cannot work as quickly as a lot of the larger companies. But let us not dwell on what hasn't happened, let us focus on what is to come. Below you will find the list of what we can see in the up and coming update.

This will be the first large update - the list reflects the workload that can be handled at a time and also allows for a shorter development time.

BUG DESCRIPTION

- Rocks bounce
- Trucks fly through air when connecting winch
- Supports can get stuck under ground
- Manually loaded logs bug
- MP Map not synced after disconnect and rejoin
- When in MP lobby, buttons become greyed out when too many players join and leave
- Unknown floating bug in MP
- Remaining texture issues
- Remaining terrain issues
- Not all MP sessions show in lobby

IMPROVEMENT DESCRIPTION

CORE:-

- Add - HUD removal option for taking screenshots
- Tweak - Increase water depth allowance when vehicle has Snorkel (UAZ)
- Add - Single map saves
- Tweak - Controller inputs need to be Analog instead of Digital (throttle/brake)
- Add - Freeroam camera
- Add - Mod support
- Tweak - Increase draw distance for high graphics settings

MULTIPLAYER:-

- Add - Option to re-join last server
- Tweak - Chat box: Allow scrollability and toggle.
- Add - Show 'In Progress...' Games
- Add - Last truck used

Estimated Launch date: 22/10/2014

*The date shown is an estimation based on a primary analysis of the contents of the update. The date above is subject to change - upon work reaching development targets, if necessary, the date will be changed to reflect progress and circumstances at that time.

We would like to apologise for the delay, however, we are now back on track and able to bring you updates and more to the game in the future.

Happy trucking!

. **Update Details (09/08/2018):**

- Kenny's hat has been added to the player character's available hairstyles.
 - A new difficulty level of "Heaven" has been added to the options.
- At this level of difficulty, an unlimited number of items can be carried in battle.

- Learnable player character skills have been added.

Once learned, these skills of the anime series characters become equippable after winning a battle.

- Functionality to choose the in-battle background music has been added to the selection screens for scout missions and past missions.

- Titan Elimination Training (Expulsion) and Titan Elimination Training (Showdown) modes have been added to the Titan Research Room.

- The completion reward for Titan Biological Research Report has been changed from Titan Research Room EXP to a Generic Statement of Deployment.

It's now also possible to carry out a Titan Biological Research Report without using any Wings of Freedom.

- Multiple pieces of equipment can now be developed at once.

- Multiple selections of materials are now possible when reinforcing weapons.

- Generic Statements of Deployment have been added to the regiment store.

They become eligible for purchase after winning a battle.

- It is now possible to skip certain camerawork during battle.

. **Maintenance for March 18th:**

Weekly Maintenance will be at approximately 11:30 AM EDT. We will notify players once maintenance has concluded..
